Living in Washington State I note first hand the benefits Microsoft has given the PUBLIC OF THE USA, not just our State. In fact many places in the world are benefactors. Also having been owner-operators of a small business for 32 years I know that competition can also be a constructive mode. I request that the Microsoft Company be allowed to operate and progress as in the past, helping to teach other businesses how to compete and to learn how success can be accomplished. Thank you for letting me offer my experiences with success . M. Jean Thompson
